

# The Bahamas Maritime Authority

06/05/2023

To whom it may concern,

BMA has reviewed the demonstrated Telescope Electronic Record Book system and finds It complies with the specific requirements set out in our Marine Notices MN009 and MN010.

Accordingly, the use of the Telescope electronic record keeping system for the recording of information, actions, events and operations required by Bahamas national legislation and International Conventions and Codes, including MARPOL is permitted, including logbooks and record books, on ships registered In The Bahamas.

The Telescope System currently holds a DNV Type Approval Cert, and complies with IMO Resolution A.916 (22) 4.4; MSC Circular 982; Applicable IEC Standards; Resolution MEPC.312 (74); and ISO 21745:2019.

Arrangements for software replacement, update or upgrade with new modules should be effectively implemented under a documented system, and this was demonstrated.

The Company is responsible for ensuring that electronic record keeping systems are maintained to the latest standards required by the BMA or the relevant international Conventions. The developers were keenly aware of this by monitoring of the of future requirements papers to be presented In IMO.

If you have any questions on this matter, please contact [tech@bahamasmaritime.com](mailto:tech@bahamasmaritime.com) or call +44 (0) 20 7562 1300

Yours sincerely,

  
Frank McNulty (May 11, 2023 14:34 GMT+1)
